

Become a Provider of the National Diabetes Prevention Program

Prevent or delay Type 2 Diabetes!

When bringing the National Diabetes Prevention Program (National DPP) to communities—a public-private partnership that offers affordable, high-quality lifestyle change programs—community-based organizations can:

- Offer a **much-needed health service** in the community
- Invest in a healthier, **more productive workforce at your organization**
- **Manage your organization health care costs** by adding a recognized diabetes prevention lifestyle change program as a **covered health benefit**
- Become eligible for **Medicare** reimbursement for diabetes prevention services
- Increase your organization's **visibility** and **credibility**
- Achieve recognition from the **Centers for Disease Control and Prevention**
- Attain **Patient Centered Medical Home** recognition

Impact of Prediabetes on Communities

Over **84 million** adults have prediabetes; **9 out of 10** do not know it.

32% of Latinos have prediabetes, but **only 8% know** that they do.

Individuals with prediabetes can reduce their risk of developing type 2 diabetes by **half** when participating in the National DPP.
