

## **2023 Advancing the Science of Diabetes Care and Education - Application**

### **PURPOSE**

The Association of Diabetes Care & Education Specialists (ADCES) aims to drive optimal evidence-based outcomes for people with diabetes and the providers who care for them by integrating diabetes self-management, education, prevention and support through six “Vision for the Specialty” pillars. Evidence supporting the value of diabetes care and education has already been established. Despite ongoing research and quality improvement efforts, large knowledge gaps exist in translating this evidence to benefit people living with or at risk for diabetes, their providers, health systems and population health nationally. Therefore, diabetes care and education translational research is needed to generate evidence-based strategies to drive improvement across the spectrum of diabetes-related outcomes.

The Association of Diabetes Care & Education Specialists (ADCES) Foundation would like to fund up to 3 projects to fulfill this purpose of supporting translational research in diabetes care and education. Each funded project, pending approval, will receive up to \$20,000 total costs. Awarded projects will explore a range of health services and outcomes research in the field which are aligned with the ADCES vision pillars. The priorities have been distilled down to the following four fields where evidence is needed to advance the science of diabetes care and education, and which are therefore identified as priorities for moving the field forward:

- Diversity and Equity
- Health Economics and Policy
- Implementation of Science
- Workforce Development (note to Kirsten: refer to the agenda)

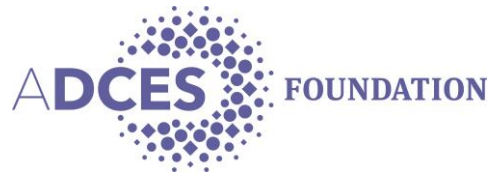

### **CRITERIA**

ADCES recognizes the need to engage and support/collaborate with health services researchers interested in implementing services that positively impact clinical, behavioral, safety, quality, and economic outcomes and enhance the experience for both the person with or at risk for diabetes and the provider. The ADCES Foundation is providing an opportunity aimed to guide researchers to design and test hypotheses which will support development and implementation of evidenced-based best practices for diabetes care and education services, including those that align with the [ADCES Research Agenda](#). Preference will be given to applicants with research experience in diabetes care and education.

### **APPLICATION PROCESS**

Applications must be submitted in Microsoft Word or PDF format, as an email attachment. Send to [grants@adces.org](mailto:grants@adces.org) by 11:59pm Central Time on Wednesday, June 21, 2023. Applications received after the deadline will not be considered.

- Funded recipients are expected to be notified on June 30, 2023
- All projects must be started by July 19, 2023
- All projects must be completed by June 18, 2024

## **2023 Advancing the Science of Diabetes Care and Education - Application**

### **REQUIRED APPLICATION MATERIALS**

- One to two-page typed project description (500-word limit) with the following information:
  - Description of the innovative project
  - Description of how the project falls under and expands at least one of the ADCES vision pillars and contributes to the ADCES Research Agenda
  - Description of the population being served
  - Description of the intended outcome of project
  - Description of your research environment and resources
  - Willingness to share potential impact through interview with ADCES staff, podcast or written article for communication and marketing purposes\*
  - IRB materials such as protocol, consent, recruitment flyer (if applicable for the project – these may be draft form and do not need to be approved at the time of submission)\*
  - Budget up to \$20,000 total costs and budget justification\*
    - Applications must abide by the [ADCES Indirect Cost Policy](#)

*\*Items noted with asterisk do not contribute to the 500-word limit*

- Completion of the following applicant information:

### **Applicant Information:**

Name			Credentials			Member ID #		
Preferred Address								
City			State			Zip		
Professional Affiliation (Employer)								
Cell Phone						Work Phone		
E-Mail Address								

*I understand and agree to abide by the entry and eligibility requirements indicated. I understand that all materials submitted in conjunction with the award application will not be returned. I agree that, if selected, highlights from the project may be used by ADCES for such purposes as sharing best practices, advertising, publicity, and promotion for or solicitation of future applications. I understand that, if selected, full funding may be contingent upon project progress. If funded, I agree to work with ADCES staff to submit progress reports outlining project achievements on a regular basis. If funded, I agree to acknowledge ADCES as a funding source in any publications resulting from this project.*
